

# PROVIDER ROSTER MANAGEMENT

Lower costs with AI-enabled workflow

The healthcare industry spends more than \$2 billion annually on inefficient and redundant work to ensure accuracy of provider data.

# THE CHALLENGE: ROSTER DATA IS DYNAMIC AND LIVES IN MANY DIVERSE FORMATS

Health plans and providers rely on provider roster data to develop directories, pay claims, refer patients to specialists, and for the credentialing process. Yet, collecting, consuming, and maintaining this data can be a never-ending challenge as it comes from disparate sources and formats.

# WE'RE YOUR PROVIDER ROSTER MANAGEMENT SECRET WEAPON

Lack of reliable provider data sources combined with multiple databases and spreadsheets managed across the business result in a costly piecemeal approach to managing provider roster data.

Our proven method to obtain and manage provider data uses our AI-powered "data machine" to consume and process provider data from any source or format.

Our AI identifies and corrects data gaps, duplicates, and outdated information. It checks the data against our own propriety master data index and 3rd party resources.

From this accurate data, we build your own master database that can be accessed and edited across your organization. This data is easily shared with external partners, making you their preferred health plan partner.

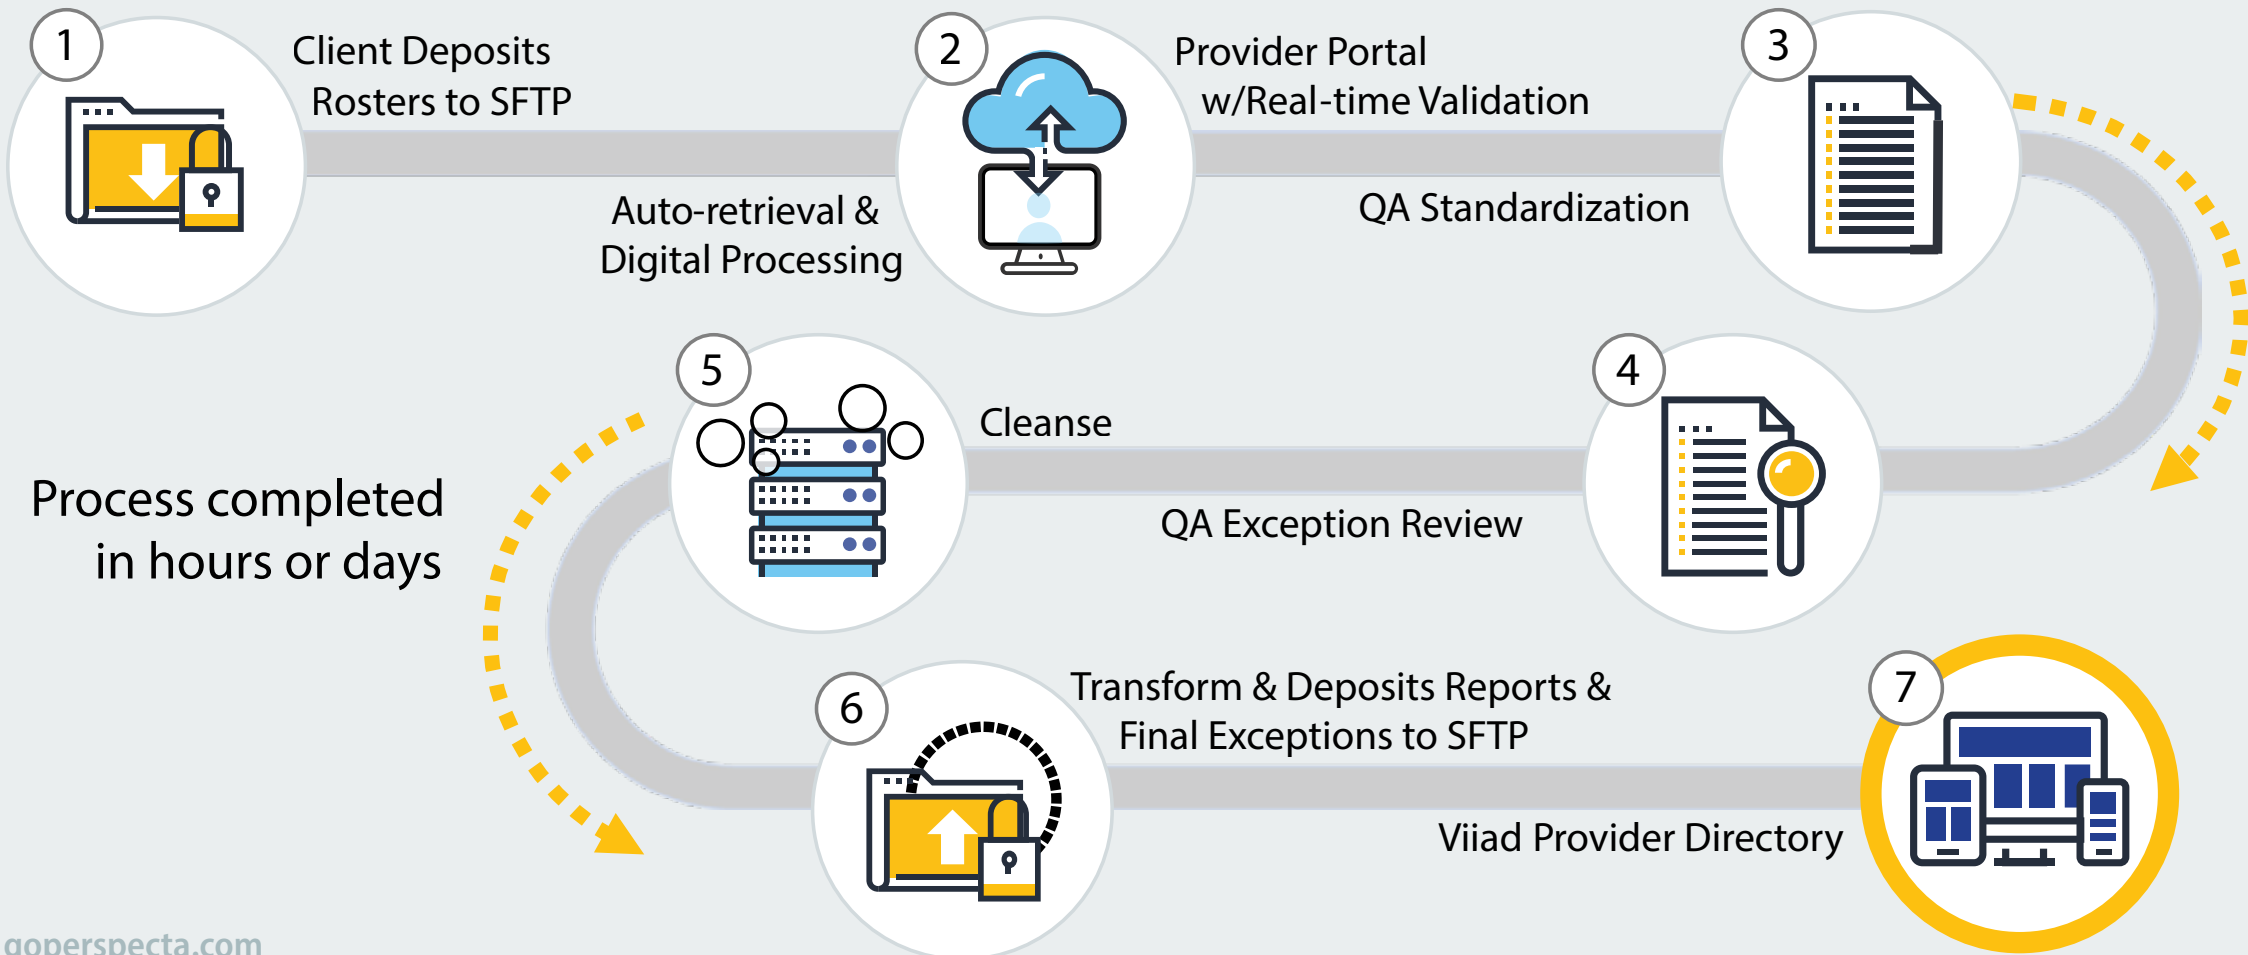

**LEAN. CLEAN.  
DATA MACHINE.**

**We use the power of  
artificial intelligence to  
aggregate, map, and  
harmonize provider  
roster data from any  
source or format**

# SMART. SIMPLE. SEAMLESS ROSTER MANAGEMENT.

# AUTHORITATIVE. ACCURATE. ALIGNED.

With the industry's highest accuracy rating of +95%, Perspecta is your best choice for provider network management.

Our solutions are smartly designed so you can source and share accurate provider roster data securely between internal teams, business units, digital technology solutions, and 3rd-party resources. We keep your provider information consistent, up-to-date and clean.
